Process Safety Engineers, HSE Engineers, PSM Consultants

AcuTech Consulting Group is a highly successful and rapidly growing process safety and security risk management company, with offices in McLean, VA (headquarters), Houston, Princeton, and San Francisco. As a global company providing consulting, training and technologies to the public and private sectors, our mission is to identify, evaluate and manage risks in order to continually improve safety, security, health, environmental, and operational performance. Read more about us on our website at www.acutech-consulting.com.

Opportunities are available at any of our office locations, in virtual offices and certain overseas locations in the Middle East.

AcuTech is presently engaged in major safety, risk, and homeland security projects in the following industries: oil and gas production & transportation (marine, offshore, onshore, pipeline, terminals), LNG, petroleum refining, petrochemicals, and other process industries, as well as various security projects with the U.S. Department of Homeland Security (DHS).

To meet our current project demands and our growth plans, we are looking to fill several positions in all of our locations. We are seeking individuals with one or more of the following qualifications:

- BS/MS in related engineering field (chemical, civil, mechanical, safety) or associated science degree.
- 5-15 years in health, safety and environment (HSE) related experience in process or engineering design environment, manufacturing operations, and/or consulting environment.
- Experience in developing, implementing, or managing process safety/risk management programs, i.e., OSHA PSM, EPA RMP, or state/local equivalent programs.
- Experience in developing, writing, and implementing HSE plans, procedures, design philosophies, design bases, engineering specifications, standard operating procedures
- Experience evaluating HSE programs and their management systems.
- Experience in performing process hazard analyses (PHA), and risk assessments, or related studies, such as HAZID, What-If, HAZOP, FMEA, fault tree/event tree analysis, fire and explosion modeling, safety integrity level (SIL) assessment, level of protection analysis (LOPA), etc.
- Ability to develop consulting business, including developing proposals and making presentations
- Self-motivated, strong leadership and organizational skills
- Excellent English verbal and written communication skills, interpersonal skills, and ability to interface at all levels
- Strong analytical, problem-solving, and facilitation skills and a consultative approach in supporting customer projects

These positions offer an excellent opportunity for personal and professional growth. AcuTech provides a competitive package of benefits including stock ownership opportunities. Salary is based on experience and qualifications.

Please email resume, salary history and preferred office location(s) to our recruiting manager at recruiting@acutech-consulting.com
