Chemical Process Security Consultants

AcuTech Consulting Group is a highly successful and rapidly growing process safety and security risk management company, with offices in McLean, VA (headquarters), Houston, Princeton, and San Francisco. As a global company providing consulting, training and technologies to the public and private sectors, our mission is to identify, evaluate and manage risks in order to continually improve safety, security, health, environmental, and operational performance. Read more about us on our website at www.acutech-consulting.com.

AcuTech is presently engaged in major safety, risk, and homeland security projects in the following industries: oil and gas production & transportation (marine, offshore, onshore, pipeline, terminals), LNG, petroleum refining, petrochemicals, and other process industries, as well as various security projects with the U.S. Department of Homeland Security (DHS). Opportunities are available at any of our office locations, in virtual offices and certain overseas locations in the Middle East.

To meet our current project demands and our growth plans, we are looking to fill several positions in all of our locations. We are seeking individuals with one or more of the following qualifications:

- BSc/MS in engineering field (chemical, mechanical, safety) and/or related experience in homeland security, security vulnerability analysis, security policy development, waterway suitability analysis, ACC Responsible Care Security Code implementation
- Professional certification (P.E., CPP, CSP) preferred
- 3-15 years in chemical security related experience in process operations, and/or consulting environment
- Experience in developing, writing, and implementing facility security plans, procedures, design philosophies, design bases, engineering specifications, standard operating procedures
- Demonstrated ability to understand and communicate complicated regulatory requirements and customer needs
- Demonstrated ability to recognize hazards, drive continual improvement, and promote practical alternatives for risk reduction and risk control measures
- Demonstrated ability to develop consulting business, including developing proposals and making presentations
- Ability to work on ethnically and culturally diverse project teams
- Self-motivated, strong leadership and organizational skills
- Excellent English verbal and written communication skills, interpersonal skills, and ability to interface at all levels
- Excellent customer service skills, presentation skills
- Highly proficient in MS Office skills (Word, PowerPoint, Excel)
- Strong analytical, problem-solving, and facilitation skills and a consultative approach in supporting customer projects

These positions offer an excellent opportunity for personal and professional growth. AcuTech provides a competitive package of benefits including stock ownership opportunities. Salary is based on experience and qualifications.
